As a dynamic full-stack developer specializing in MERN and MEAN stacks, I excel in crafting scalable, robust web applications. With a flair for innovative problem-solving and a commitment to excellence, I adeptly transform complex requirements into user-centric solutions. My proactive approach in leveraging MongoDB, Express.js, React/Angular, and Node.js ensures high-quality, efficient project outcomes. Collaborative and detail-oriented, I consistently deliver results that align with business goals and elevate user experiences.

WORK EXPERIENCE

Front-end developer Orange Antelopes

03/2023 - Present

Bhopal

Achievements/Tasks

- Successfully spearheaded the front-end development of three key systems - Human Resource Management System, Hotel Booking System, and Warehouse Management System - significantly enhancing user experience and functionality. My contribution in these projects involved creating intuitive, responsive interfaces and ensuring seamless integration with backend services. This led to improved operational efficiency, user satisfaction, and played a pivotal role in streamlining complex processes in human resource management, hospitality, and inventory control sectors.

PROJECTS

Enterprise Resource Planing System (05/2023 - Present)

- In my role, I develop the HRMS module of an ERP suite using Angular, streamlining HR functions like recruitment and payroll, ensuring a user-friendly and efficient interface for enhanced HR efficiency

Human Resource Management System (05/2023 - Present)

- As a front-end developer, I enhance the HRMS module of an FMCG company's ERP system using Angular, focusing on user-friendly design for efficient HR management and improved operational workflows.

ACHIEVEMENTS

Demonstrated Expertise in Multi-Project Management:

Excelled in simultaneously managing and contributing to multiple high-priority projects, showcasing exceptional organizational skills and adaptability. My ability to efficiently juggle the front-end development of a Human Resource Management System, a Hotel Booking System, and a Warehouse Management System stands as a testament to my robust project management capabilities. This experience honed my skills in prioritizing tasks, coordinating with diverse teams, and maintaining high-quality standards under tight deadlines, ensuring successful and timely delivery across all projects.
